# SPARES, REMEDIAL AND SERVICING

## **SPARES**

To keep your existing treatment plant in top working condition EWwS Ltd. offer a fully comprehensive stock of spare parts to fit all types of units. These include drive and steelwork components, bearings, gearboxes, pumps, blowers and media sheets. We can even offer complete replacement shafts for RBC units.

## **REMEDIAL**

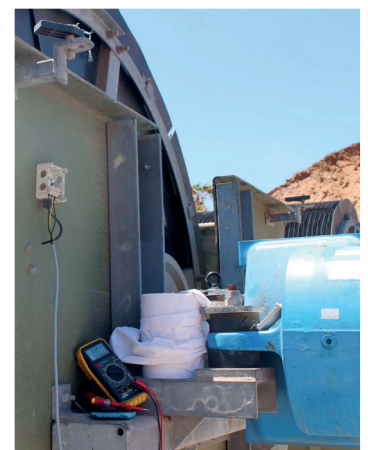

To negate the need to replace your broken treatment plant EWwS Ltd. can offer a full remedial package to get your plant back up and running. This can include a full site survey to establish what is required, and then we can offer our site services to repair your broken unit.

## **SERVICING**

To keep your unit running smoothly and efficiently we can offer a full service arrangement including regular supervised desludging to maintain optimum effluent quality. We can include call outs and effluent testing if required.

For more information on any of the above or a friendly chat to discuss your needs please contact EWwS Ltd.
